*We cordially invite you to our
Market Influencer Briefing*

“Multi-class risk management for the specialty lines”

Palais Heracles, Avenue Albert, Monte Carlo on Saturday 10th September 2011 from 18.30 to 19.30

Join us for one hour to learn how Russell is addressing the multi-class need and delivering value to clients. We will be offering drinks at the end of this briefing.

The risk landscape is becoming more complex, exposures now spread unbounded by any obvious physical or contractual relationship, as characterised by Madoff, Deepwater, Japanese business interruption and contingency losses. To protect underwriting results (re)insurers need good risk management systems and practices.

Risk management is no longer contained within a single class, it is truly multi-class and requires sophisticated portfolio analysis, aggregate control and simulation of possible scenarios.

Russell Group is a leading risk management software and service company that provides a truly integrated approach to aggregate management, pricing and portfolio modelling by supporting insurance, reinsurance and retrocession needs across the specialty classes. We blend innovative technology with expertise in financial mathematics to deliver open, integrated, robust and scalable solutions.
